

Elanra Air™ Ioniser Pendant: RRP \$295

Elanra Air™ complies with all aircraft safety requirements, providing travellers with the beneficial and therapeutic effects of enhanced negative ion air quality wherever they go. With nine easy-to-program settings, including three output levels and three different frequencies, you can customise the **Elanra Air™** to the different stages of your trip to ensure you arrive at your destination feeling refreshed and alert.

The **Elanra Air™** is conveniently compact and can be worn comfortably around the neck, providing you with unrestricted freedom and therapeutic benefits while travelling. So on your next interstate trip or long haul flight to Paris, New York or London, give yourself a breath of fresh air and arrive at your destination rejuvenated and stress free.

Elanra Air™ is fully rechargeable; an international charger kit with universal adaptors is included with your purchase.

What are Negative Ions?

Without fresh air, the average human being would only last three minutes, and we must breathe 10,000 liters each day to survive. The difference between fresh air in an open natural environment and that found in stuffy, polluted buildings and vehicles comes down to the balance of positive and negative ions of oxygen.

When breathed into your lungs, positive ions are taken into your bloodstream, where they can trigger various harmful responses such as the release of excess serotonin and histamine. In excess, these substances are known to produce adverse effects to the vascular and respiratory system, commonly resulting in headaches, allergies, hay fever, nausea and insomnia.

The presence of nature's negative ions in the environment has long been associated with improvements in our physical and mental health and wellbeing. Extensive research supports the view that these small negative ions of oxygen have many positive therapeutic effects and have been shown to help accelerate the body's natural healing process, eliminate air borne bacteria, increase lung capacity, improve sleep, boost the body's immune system, reduce stress and anxiety and lift moods.

A device like no other

Elanra Air™ is the only ioniser to produce the small negative ions found in nature that are associated with therapeutic benefits.

The **Elanra Air™** is also included as a medical device on the **Australian Register of Therapeutic Goods (ARTG 138924)**, with its intended purposes listed to include:

- improved health & well being
- alertness while driving
- to assist recovery from illness & fatigue
- helps improve sleep (on long haul flights)
- assists allergy sufferers
- clears the ambient air of dust & airborne pollutants

Elanra Air™ Features

- Market leader in Therapeutic Ion technology
- Complies with all international electrical and safety standards
- Accredited for air travel, intensive care and general hospital use
- Ideal for home, work, school, study, travel and more!
- Fully programmable with nine individual settings
- LED function display and simple touch controls
- Includes re-charger with international adaptors
- International 12 month warranty

Elanra Air™ Product Specifications

Programs

- 3 Output levels
- 3 Frequency settings : 4Hz, 10Hz (Alpha), 25Hz
- Total 9 individual settings

Dimensions

- Height: 59.18mm
- Base: 64.35mm
- Thickness: 24.73mm

Ozone Emission

None detected.

Weight

- **Elanra Air** including lanyard – 68.2g
- Power supply including adaptors – 133g

AC Recharger

Switch mode power supply (electronic) certified for use in all countries.

Lithium Ion Battery

3.7V, 750mAh rechargeable battery capable of 1000 charges or approximately six years based on an average daily use of 12 hours across the three output levels.

Needle

1 x special alloy needle replaceable after 1200 hours.

Electronic Circuitry

Crystal controlled advanced programmable microprocessor circuit.

Workmanship Guarantee

Twelve months guarantee on labour and materials.

Electrical & EMC Safety Standards

Elanra is the only Ioniser tested and compliant with all international standards in EMC and electrical safety.

C-Tick

N3656

CE Hospital Medical

EN60601-1:2006

CE Mark Tested Compliance with;

EN60601-1-2:2007

EN55011:2007 + A2:2007
